Experience

- Currently working in Data Collection Infotech Private Limited (DCIL) since 2019 as a Technical Associate.
- DCIL is a service based company in that we are using a software called Roadware Vision.
- Roadware vision is a software in which the scanned pavements of the cities of USA will be uploaded. The images which are scanned by ARAN (Automatic Road Analyzer) are converted into files such that the distress can be rated on the scanned images through Roadware vision Software. The rating method for the unique for the different cities for example If we have pavements of the city Virginia it has some protocols according to that the distresses on the roads are done. Firstly the files will be checked manually according to the protocol. At last the rating has been done the files are sent to classification, in classification the rated distresses are rechecked by the roadware vision software whether the distresses rated are according to the protocol are not.

Key Skills

- Communication Skill
- Problem solving
- Teamwork
